

Project (3): Cloud Infrastructure as a code IaC

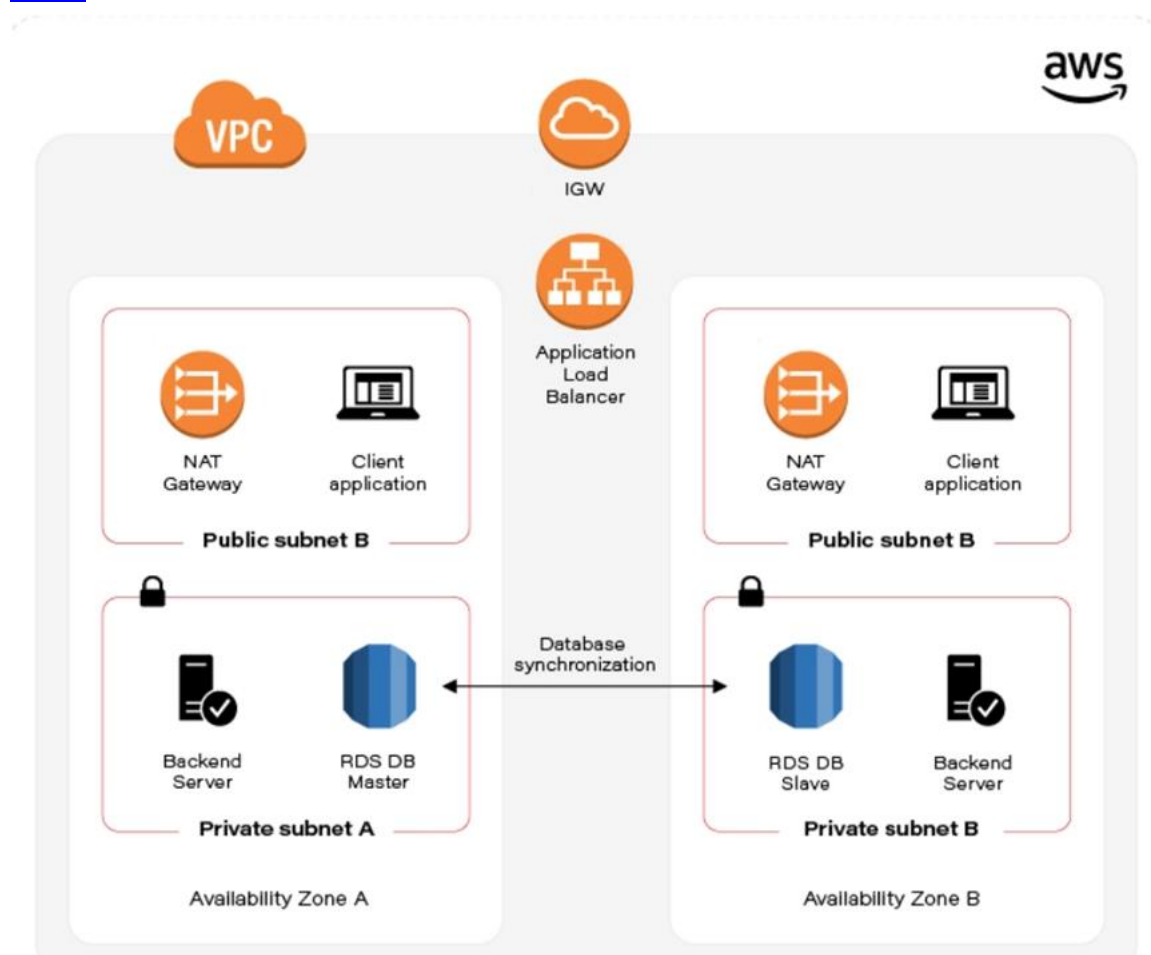

The project target is to Target to design, build and automate cloud infrastructure using AWS cloudformation.

Network Architecture will be designed using Lucid Chart tool, then will use AWS Cloudformation and IaC to automate creation of VPCs, Public/Private subnets, AZs, NAT GWs, IGW, Servers EC2 Instances and DBs.

Below links for documentations will be used for this project with AWS EC2 VMs:
